Internships

Full Stack Web Developer Intern

Jan 2025 - Mar 2025

IIT Kanpur – Human Factors and Sociotechnical Systems Studio

- Developed and deployed 3+ scalable web applications, handling 10K+ daily users, leveraging the MERN stack, including fully functional platforms with secure payment gateways and API integrations.
- Streamlined back-end queries and database indexing, improving data retrieval speed and overall system performance by 80%.
- Implemented JWT-based authentication, role-based access control, and secure API endpoints to safeguard user data and transactions.

Web Developer Intern

Jul 2024 - Nov 2024

Labdax

- Spearheaded the development of a new user interface with enhanced features and interactive web design, improving user engagement and accessibility.
- Optimized front-end performance, reducing load times by 70% through efficient code refactoring, lazy loading, and asset optimization.
- Contributed to the adoption of best coding practices, version control (Git), and modern UI/UX principles, enhancing overall development efficiency.

Projects

Product Management Site | React.js, Supabase, Tailwind CSS, JavaScript

Feb 2025 - Mar 2025

- Developed a full-stack product management platform with real-time updates and user authentication, demonstrating strong full-cycle development capabilities within a short timeline.
- Designed optimized PostgreSQL schema in Supabase, improving query performance and data retrieval speed by 30%.
- Built dynamic product CRUD operations with filtering, sorting (by price, rating), pagination, and image upload, enhancing user experience and admin efficiency.

Grocery List AI Planner | React.js, Node.js, Express.js, OpenAI API, Tailwind CSS

Nov 2024 - Dec 2024

- Engineered a full-stack AI-powered grocery planning application that dynamically generates optimized shopping lists and meal suggestions using OpenAI's GPT API, significantly improving user decision-making and planning efficiency.
- Architected and deployed a scalable RESTful backend using Node.js and Express.js to manage API requests, prompt handling, user sessions, and response caching, while leveraging OpenAI API for NLP-based list generation and meal recommendations tailored to user dietary preferences, restrictions, and budget constraints.
- Emphasized performance optimization, modular code architecture, and security best practices to ensure maintainability, scalability, and minimal latency.

Certifications

Frontend Developer

Mar 2025

HackerRank

Software Technology Job Simulation

Feb 2025

CITI

Technical Skills

Languages C++, Java, SQL, JavaScript, HTML, CSS, TypeScript, Kotlin

Technologies/Frameworks: Angular, ReactJS, NodeJS, MongoDB, ExpressJS, Gen AI, Git, GitHub, Linux, OpenAI APIs

Skills: Data Structures and Algorithms, Responsive Web Design, Scripting in JavaScript, System Architecture

Education

Lovely Professional University Punjab

Aug 2022 – Aug 2026

Computer Science and Engineering — CGPA: 8.0

Jalandhar, Punjab

Delhi Public School

May 2021 – Aug 2022

12th with Science — Percentage: 88.00%

Kanpur, Uttar Pradesh
